PARTNER ROADSHOW 2026

South East Asia GitHub Partner Roadshow

Building the future of software, together.

March 2026 | South East Asia | #GitHubPartnerRoadshow

STATE OF THE OCTOVERSE 2025

The South East Asia Opportunity

APAC is GitHub's fastest-growing region — and SEA is at the heart of it.

+13M
new APAC developers
in 2025 alone

4.37M
developers in Indonesia
up from 0.9M in 2020

~25/min
new APAC developers
joining GitHub every minute

SEA MARKET HIGHLIGHTS

Country	Developers	YoY Growth
Indonesia	**4.37M**	▲ 386%*
Philippines	**1.7M+**	▲ 29%
Singapore	**High density**	**AI Hub**

Why SEA, Why Now

- Indonesia is SEA's digital powerhouse — accounting for nearly half the region's online economy
- Singapore's National AI Strategy & Smart Nation initiative drive enterprise demand
- 80% of new developers use GitHub Copilot within their first week
- AI-assisted local-language tooling unlocking non-English developer communities

180M+ developers worldwide

GITHUB COPILOT FEATURES

GitHub Copilot — Command Your Craft

Your AI accelerator for every workflow — from the editor to the enterprise.

Up to **55%** faster coding productivity

CODE & EDITOR

Code Completion
Inline AI suggestions as you type across all languages

Chat in IDE
Debug, explain & ask questions in VS Code, JetBrains & more

Agent Mode
Multi-file edits, validation & autonomous iteration in editor

Multi-LLM Choice
GPT, Claude, Gemini & more — pick for speed, accuracy, or cost

AGENTS & AUTOMATION

Coding Agents
Assign issues to Copilot, Claude, or Codex — they code & create PRs

Copilot CLI
Natural language in terminal — plans, builds & executes workflows

Code Review
AI-powered PR reviews for all team members, even without a seat

Copilot Autofix
Auto-detects & fixes security vulnerabilities via Advanced Security

ENTERPRISE & PLATFORM

Copilot Spaces
Shared knowledge from docs & repos — keeps teams consistent

MCP Integrations
Secure MCP server connections — admin-controlled allow lists

Works Everywhere
VS Code · JetBrains · Visual Studio · GitHub.com · Mobile · CLI

Privacy & IP Protection
Data never trains models · IP indemnity · code reference filter

PLANS & PRICING

Free $0/mo
2K completions · 50 chats

Pro ★ $10/mo
Unlimited completions & chat

Pro+ $39/mo
Agents + premium models

Business
$19/u/mo
Org management + policies

Enterprise
$39/u/mo
Full platform + IP indemnity

AGENDA

Today's Agenda

01

Introduction to GitHub

Platform overview and capabilities

02

GitHub Copilot

AI-powered development

03

GitHub Actions

CI/CD automation

04

Advanced Security

Securing your code

05

GitHub Codespaces

Cloud development environments

06

Q&A

Your questions answered

ABOUT GITHUB

The World's Leading AI-Powered Developer Platform

GitHub is the world's leading AI-powered developer platform

100M+
developers worldwide

330M+
repositories on GitHub

90%
of Fortune 100 companies

190+
countries with users

The competitive advantage developers ask for by name.

LIVE DEMO

GitHub Copilot in Action

See it in Action

fibonacci.py

```python
# Example: Copilot helping write a function

def calculate_fibonacci(n):
    # Copilot suggests the implementation
    if n <= 1:
        return n
    return calculate_fibonacci(n-1)
         + calculate_fibonacci(n-2)
```

Live Demo Topics

Code Completion

Real-time inline suggestions as you type

Function Generation

Generate entire functions from comments

Test Creation

Auto-generate unit test suites

Documentation

Write docs from code context

GITHUB ACTIONS

Automate Your Workflow

CI/CD Made Simple

CI/CD Features

- Build, test, and deploy directly from GitHub
- Pre-built actions marketplace (15,000+ actions)
- Matrix builds for multiple OS & language versions
- Self-hosted or GitHub-hosted cloud runners
- Workflow triggers on any GitHub event

Popular Use Cases

Automated Testing

Run tests on every push and pull request

Deployment Pipelines

Deploy to AWS, Azure, GCP, or any cloud

Code Quality

Enforce linting, formatting & standards

Security Scanning

Find vulnerabilities before production

GITHUB ACTIONS

CI/CD Pipeline Example

A simple workflow that builds, tests, and deploys on every push.

.github/workflows/ci.yml

```yaml
name: CI/CD Pipeline

on: [push, pull_request]

jobs:
  build:
    runs-on: ubuntu-latest
    steps:
      - uses: actions/checkout@v4
      - name: Run tests
        run: npm test
      - name: Deploy
        if: github.ref == 'refs/heads/main'
        run: npm run deploy
```

GITHUB ADVANCED SECURITY

Secure Your Software Supply Chain

01 Code Scanning

Identify vulnerabilities and coding errors using CodeQL and third-party tools

02 Secret Scanning

Detect and prevent credential leaks — API keys, tokens, and passwords

03 Dependabot

Automated dependency updates with security alerts and pull requests

04 Security Advisories

Private vulnerability reporting and coordinated disclosure

✓ Find issues before production ✓ Automated security fixes ✓ Compliance and audit trails

GITHUB CODESPACES

Your Dev Environment, Anywhere

Cloud-based development environments, ready in seconds.

What are Codespaces?

- Cloud-based development environments
- Pre-configured and ready in seconds
- Full Visual Studio Code experience in the browser
- Customizable with devcontainers on any device

Why Codespaces?

Work from Anywhere

No local setup — code from any browser

Consistent Environments

Eliminate 'works on my machine' problems

Instant Onboarding

New team members productive in minutes

Flexible Compute

Scale from 2-core to 32-core on demand

GITHUB ENTERPRISE

Built for Organizations

Enterprise-grade tools for teams of every size.

Enterprise Security

SOC 2, FedRAMP, and industry-leading compliance certifications

Advanced Auditing

Detailed audit logs, API access, and comprehensive reporting

SAML / SSO

Integrate with your identity provider for seamless authentication

Premium Support

24/7 priority support with dedicated SLA guarantees

Advanced Collaboration

Code owners, protected branches, required reviews, and draft PRs

Policy Enforcement

Organization-wide policies, rulesets, and governance at scale

SUCCESS STORIES

Companies Thriving with GitHub

Global Leaders

- Microsoft
- Google
- Amazon
- Netflix
- Spotify
- Airbnb
- Shopify
- Stripe

...and thousands of startups worldwide

Southeast Asia

- **Fintech & E-commerce**
  Leading platforms building on GitHub
- **Government Projects**
  Digital transformation initiatives
- **Education**
  Universities and coding bootcamps
- **Open Source Growth**
  Rapidly expanding contributions

90% of Fortune 100 trust GitHub • **100M+** developers worldwide

GETTING STARTED

Your Journey Begins Here

FOR INDIVIDUAL DEVELOPERS

1. Create a free account at github.com
2. Try GitHub Copilot (free trial available)
3. Explore public repositories
4. Contribute to open source

FOR TEAMS & ORGANIZATIONS

1. Assess your team's needs and workflows
2. Schedule a personalized demo
3. Plan migration and onboarding
4. Training and enablement

PRICING & PLANS

Flexible Options for Every Team

Free

$0

forever

- ✓ Unlimited public & private repos
- ✓ GitHub Actions (2,000 min/mo)
- ✓ Codespaces (60 hrs/mo)
- ✓ Community support
- ✓ Dependabot alerts

MOST POPULAR

Team

$4

per user / month

- ✓ Everything in Free, plus:
- ✓ Advanced collaboration features
- ✓ Protected branches & code owners
- ✓ Required reviewers
- ✓ 3,000 Actions min/month

Enterprise

Custom

pricing

- ✓ Everything in Team, plus:
- ✓ GitHub Advanced Security
- ✓ Premium 24/7 support & SLA
- ✓ SAML SSO & audit log API
- ✓ Dedicated success team
